Subject index

Key: A = abstract; b = book review; c = correspondence; r = review; s = Supplement, Immunology in Diabetes '84 (selected papers from symposium); w = workshop report

- A-cell, pancreatic [see also Islet-cell, pancreatic]
 - duck - function 302 A
 - insulin receptors undetectable 342 A
- ABO blood group - diabetes and 235
- Acanthosis nigricans and insulin resistance 253 A
- Acetylator phenotype - diabetes and glycaemia 235
- Acetylsalicylic acid - glucose homeostasis, effects on 260 A
- Adipocyte (see also receptor insulin) adenylate cyclase - rat 293 A
 - glucose transport 346 A
 - lipoprotein lipase - insulin sensitivity 364
 - metabolism - catecholamine effects 284 A
 - phospholipase C 297 A
- Adipogenic activity - human serum 286 A
- Adipose tissue - composition - diabetes 303 A
- Adrenalectomy - glucose homeostasis - dog 278 A
- Affinity chromatography - glucagon 392
 - glycosylated proteins 56
- Ageing - diabetes 167 r
 - glucose haemostasis and 291 A
- Aldose reductase inhibitor [see also Neuro-pathy; Kidney; Sorbinil]
 - efficacy - monitoring 514
- Alloxan - antagonists 587
 - mitochondria, effects on 379
 - pancreatic B-cell, effect on 403
 - mechanism 587
- α -amylase inhibitor - Tendamistat 329 A
- α -glucosidase inhibitor 288 A
 - BAY m1099 - diabetes, Type 2 346 A
 - BAY 1248 - diabetes, Type 1 323 A
- Angiotensin II - diabetes, Type 1 174
- Antibody - collagen - diabetes 339 A
 - insulin - assay 274 A
 - - - ELISA 311 A
 - - - workshop 300 A
 - diabetes, Type 1 - biological effect 347 A
 - - - insulin bioavailability 333 A
 - - - disappearance rate 592
 - exogenous - HLA not important 253 A
 - human - spontaneous 346 A
 - immune complexes - diabetes - pregnancy 83 s
 - insulin bioavailability, effect on 143 s
 - pregnancy, diabetic 277 A
 - spontaneous 324 A
 - insulin-receptor - anti-idiotypic 332 A
 - multiple populations 268 A
 - islet-cell - assay - human B-cell clone 308 A
 - diabetes - mouse - *db/db* 139 s
 - diabetes, adult-onset - HLA 90 s
 - diabetes, Type 1 - C-peptide 307 A, 421
 - experimental - antigenic specificity 70 s
 - non-obese diabetic mouse 113 s
 - pre-diabetes 146 s, 289 A
 - production in vitro - diabetes, Type 1 347 A
 - species specificity 299 A
 - surface - congenital rubella, in 87 s
 - thyrogastric - diabetes, Type 1 - genetic markers 124 s
 - thyroid microsomal - diabetes, Type 2 - race 59
 - tubulin - diabetes, Type 1 427
- Artery - smooth muscle - growth factors 320 A
- Autoimmunity [see also Antibody; Lymphocyte]
 - cell-mediated - insulin - spontaneous 332 A
 - pancreatic - diabetes, Type 1 313 A, 322 A
 - islet - non-obese diabetic mouse 121 s
- B-cell, pancreatic [see also Islet cell; Islet]
 - alloxan, effects of 403, 587
 - antigenicity - M, 40000 glycoprotein 70 s
 - clonal - R1Nm5F - proliferation 256 A
 - cyclosporin A, effect of 416
 - in vitro - mouse 66 s
 - electrical activity - cyclic AMP, role of 309 A
 - function - assessment - C-peptide, urinary 274 A
 - diabetes, Type 2 280 A
 - calcitonin, effect of 318 A
 - diabetes, Type 1 421
 - diabetes, Type 2 289 A
 - gap junctions 290 A
 - insulin receptor - rat cell line 342 A
 - ionic flux [see also Islet, pancreatic]
 - cadmium 315 A
 - free cytosolic 326 A
 - calcium pools - discrimination 345 A
 - K channel - pharmacology 318 A
 - metabolism - fatty acid 342 A
 - microanalysis - proton bombardment 293 A
 - regeneration - pancreatectomy, subtotal 38
 - streptozotocin, effect of 587
 - surface morphology - insulin, effect of 347 A
 - toxic agents - 5-hydroxy-pseudouric acid 403
 - dehydrouramil 403
- Bacteriuria [see Urine]
- BB rat
 - diabetes - humoral autoimmunity in 258 A
 - immune complex levels 265 A
 - immunotherapy - cyclosporin 304 A
 - glucocorticoid 271 A
 - islet-cell antibody - cytotoxic 301 A
 - monoclonal 260 A
 - MHC 77 s
 - Class II 269 A
 - restriction fragment polymorphism 294 A
 - transfer - conditioned media, by 284 A
 - host immunity 314 A
- substrains - immunogenetic differences 296 A
- Benzothiadiazine derivative - diazoxide - effects - dog 583
- Beta-2 microglobulin - macrovascular disease 291 A
- Biopsy - pancreas graft 149 s
- Blood
 - clotting - diabetes, Type 1 265 A
 - transfusion - experimental diabetes, effect in 160 s
 - flow - neuropathy 563
 - subcutaneous - autoregulation 295 A
 - pressure - diabetes, Type 1 - angiotensin II 174
- Bone metabolism - diabetes, Type 1 - metabolic control and 334 A
- Brown adipose tissue - control 261 A, 291 A
- C-peptide - plasma - neonatal 553
- Capillary - permeability - diabetic complications 341 A
- Cardiac [see Heart]
- Chinese hamster - pre-diabetes 387
- Chlorpropamide [see Hypoglycaemic agent]
- Ciglitazone [see Hypoglycaemic agent]
- Collagen - properties - *ob/ob* mouse 44
- Colour vision - abnormal - glycosylated Hb correlation 313 A
- Compartmental analysis 207
- Complement - C4 - diabetes, Type 1 116 s, 124 s
- Computer - diabetic clinic [see Diabetes - clinic]
 - education [see Education]
- CSII (continuous SC insulin infusion) [see Insulin infusion]
- Contraceptive, oral - glucose homeostasis and 305 A
- Cyclophosphamide - NOD mouse, effect in 601
- Cyclosporin A [see also Diabetes, experimental; Diabetes, Type 1; Transplantation]
 - pancreatic B-cell, effect on 66 s, 416
 - replication 252 A
- Diabetes [see also Diabetes, Type 1; - Type 2]
 - animal model [see BB rat; Chinese hamster; Diabetes, experimental; Mouse; *Psammomys*]
 - B-cell function, residual - immunology 310 A
 - brittle - adipocyte insulin binding 441
 - classification - islet-cell antibody - HLA and 90 s
 - clinic - data processing 280 A, 282 A
 - education [see Education]
 - epidemiology - Cyprus 338 A
 - elderly 167 r
 - experimental
 - alloxan - islet-cell replication 464
 - mechanism 379
 - alloxan-like agents - mechanism 403
 - enzyme, induction therapy 334 A
 - Freund's adjuvant + streptozotocin 163 s

- hyperphagia in 298 A
- streptozotocin - islet culture, effect 321 A
 - low-dose - genetics 160s
 - immunocytes 296 A
 - immunology 109s, 160s
 - gut hormones - rat 254 A
 - kidney - rat 32
 - methionine metabolism 468
 - subtotal pancreatectomy - rat - strain 38
- haemochromatosis-associated - islet morphology 323 A
- pathogenesis 610c
- juvenile-onset [see Diabetes, Type 1]
- maturity-onset [see Diabetes, Type 2]
- mortality - historical - Sweden 327 A
- screening - fasting plasma glucose 311 A
- tropical pancreatic - heterogeneity - India 311 A
- Diabetes, Type 1**
 - aetiology - life events and 325 A
 - autoimmune features - longitudinal study 303 A
 - B-cell function, residual - importance 309 A
 - blood pressure - angiotensin II 174
 - brittle - adrenaline, effects of 279 A
 - factitious 279 A
 - insulin deprivation 290 A
 - childhood - control - psychological factors 312 A
 - complications - early diagnosis 310 A
 - epidemiology - Israel 294 A
 - The Netherlands 203
 - Sweden 266 A
 - genetics
 - complement - C2 257 A
 - C4 116s, 124s
 - HLA - D - 'JA' (DR4-associated) 126s
 - DR2 segregation 80s
 - immunoglobulin allotypes and HLA 504
 - heterogeneity - autoimmunity 255 A
 - T-lymphocytes 106s
 - immunotherapy - cyclosporin A 253 A
 - islet-cell antibody 306 A
 - interferon 193
 - methisoprinol 279 A
 - islet-cell antibody - C-peptide and 421
 - kidney [see also Kidney; Nephropathy, diabetic; Urine]
 - glomerulo-tubular balance 189
 - lithium clearance 189
 - metabolic control - psychological stress 295 A
 - newly-diagnosed - insulin sensitivity 497
 - pancreatic B-cell function - mebendazole and 52
 - pre-diabetes - islet-cell antibody 146s
 - markers 303 A
 - pancreatic B-cell function 146s
 - remission [see also Diabetes, Type 1 - immunotherapy] 285 A
 - seasonal variation 203
 - susceptibility - lymphocyte subpopulations 132s
 - treatment - conventional - efficacy 344 A
 - tolbutamide 8
 - tubulin antibody 427
 - young children 292 A
- Diabetes, Type 2**
 - aetiology - physical activity 578
 - C-peptide - fasting - factors affecting 23
 - development - prospective 10-year study 332 A
 - diet treatment - insulin response to glucose 295 A
 - enzyme-induction therapy 301 A
 - epidemiology - Aboriginal Australians 316 A
 - Fiji 578
 - Israel 326 A
 - Nauru 23
 - Papua New Guinea 370
 - genetics - HLA - Papua New Guinea 370
 - growth-hormone - response to GHRF impaired 529
 - immunogenetic features of Type 1 diabetes 280 A
 - insulin receptor defective 282 A
 - insulin degradation, cytosolic 17
 - insulin therapy - withdrawal 281 A
 - C-peptide levels 294 A
 - islet histology - amyloid 527
 - management - rural versus specialist centre 269 A
 - mortality - obesity and 328 A
 - prediction - impaired insulin release 272 A
 - treatment - metabolic effects 288 A
 - UK prospective study 419c
 - young people - pancreatic B-cell function 343 A
- Diabetes - virus-induced - mouse - immunology 261 A**
- Diazoxide [see Benzothiadiazine]**
- Diet**
 - guar - metabolic effects 319 A
 - diabetes, Type 1 - compliance 309 A
 - intensified insulin therapy, during 287 A
 - sucrose 264 A
 - diabetes, Type 2 - guar 289 A
 - fibre 294 A
 - hypertension and 522
 - low-sodium, high-fibre, low-fat 522
- Dupuytren's contracture - diabetic macroangiopathy associated 303 A**
- EASD - Organization Section 64, 244, 420, 486**
 - General Assembly - 19th 245
 - 20th 249
- Editorial - A letter to our readers 1**
- Education**
 - diabetes - computer-assisted 266 A
 - effectiveness 261 A, 293 A
 - Hungary 332 A
 - long-term assessment 306 A
 - patients 243b
 - diabetes, Type - evaluation 62c
 - diabetes, Type 2 - project work 273 A
- Endothelial cell [see also Microangiopathy]**
 - glucose transport - glucocorticoid effect 316 A
 - replication - glucose, high concentration and 62c
- Endothelium - diabetic microangiopathy 493**
- Energy expenditure - metabolic control in Type 1 diabetes and 13**
- Epidemiology of diabetes [see Diabetes - epidemiology]**
- Erythrocyte - aggregation - diabetes, increased in 517**
- Exercise**
 - diabetes - glucagon in - dog 345 A
 - metabolic control, effects on 13, 326 A
 - prevalence 578
 - fatty acids, non-esterified 328 A
 - ketone-body kinetics - normal man 274 A
 - muscle protein metabolism - mouse, lean/obese 253 A
 - training - diabetes, Type 2 266 A
- Eye - pupil 50**
- lens [see Lens, crystalline]**
- Fat [see also Adipocyte]**
 - mobilization - regulation - adrenergic 272 A
 - brown [see Brown adipose tissue]
- Fatty acid - β -oxidation - pyruvate dehydrogenase (heart) 263 A**
- metabolism - diabetes, Type 1 - metabolic control and 341 A**
- Fibronectin - diabetic microangiopathy 493**
- plasma - diabetes 268 A**
- Foot - diabetes - clinic - amputations reduced 272 A**
- Free radicals 587**
- Gastroparesis diabeticorum - treatment - metoclopramide 334 A**
- Gene, Genetics [see also Diabetes, Type 1; Diabetes, Type 2; HLA; MHC]**
 - AB0 blood groups 235
 - acetylator 235
 - apolipoprotein 180, 342 A
 - insulin 180
 - expression - glucose, effect of 252 A
 - polymorphism - coronary heart disease 293 A
 - diabetes, Type 1 288 A
 - racial variation 346 A
 - restriction fragment length polymorphisms 180
- GIP - chylomicron clearance 300 A**
 - labelled - biological activity 306 A
- porcine - diabetes, effects in 299 A**
- secretion, fat-stimulated 484c**
- Glomerular filtration - diabetes, Type 1 189**
- Glucagon [see also Glucagon-like peptide]**
 - 37 (oxyntomodulin) - action - insulin release 292 A
 - specific receptor 269 A
 - action - ketogenesis - dog 287 A
 - hypoglycaemia, role in 485c
 - immunoreactants - distribution - rat 295 A
 - salivary gland, rat - artefact 392
 - guinea-pig pancreas 265 A
 - infusion - insulin resistance induced by NOD mouse 460
 - obesity - hypothalamic 325 A
 - pancreatic secretion - hypothalamic lesion - rat 535
 - pharmacokinetics - route of administration 313 A
 - salivary gland - synthesis - rat 472
 - secretion - benzothiadiazines, effects of - dog, rat 583
 - diabetes, Type 1 285 A
 - L-leucine, effect of 303 A

Glucagon-like peptide-1

- action 278 A, 599
- assay 341 A, 599
- insulin release, effects on 328 A

Glucose

- blood - screening for diabetes 574
- self-monitoring - colour vision and 263 A, 301 A
- diabetes, Type 1, role in 305 A
- education 258 A
- storage of blood, effect of 267 A
- test strips compared 334 A
- cycle - diabetes, Type 2 and acromegaly 294 A
- hepatic uptake - portal versus arterial infusion 250 A
- homeostasis - portal catheter studies in ambulant rat 320 A
- diurnal variation 574
- seasonal variation 574
- metabolism - muscle - hyperglycaemia, effect of 262 A
- route of glucose administration, effect of 284 A
- tissues, individual - in vivo 274 A
- oral load - 75-g - healthy man 251 A
- oxidation - inhibition - mechanism 295 A
- plasma - assay - electrode - glucose oxidase 296 A
- tolerance - curve - equation of 336 A
- impaired 574
- prognosis 338 A
- prognosis - microangiopathy 307 A
- transport - heart - *fa/fa* rat 348 A
- utilization - peripheral - leucine, inhibition by 330 A

Glucosidase, alpha- [see α -glucosidase inhibitor]

Glycogen synthase - muscle, skeletal - rabbit 293 A

Glycosylated haemoglobin

- assay - affinity chromatography 56
- haemoglobinopathies and 596
- diabetic clinic - experience 332 A
- neonatal 553
- normal man - long-term stability 310 A
- retinopathy 198
- screening for diabetes 275 A, 294 A
- glycosylated protein - animal models 281 A
- assay - affinity chromatography 56
- erythrocyte membrane - diabetes, Type 1 302 A

Greyhound 27

Growth hormone

- deficiency - insulin sensitivity increased 328 A
- GHRF, response to - diabetes, abnormal in 322 A, 529

Growth peptides, diabetes, variations in 298 A

Haemochromatosis - diabetes - pathogenesis 610c

Haemoglobinopathy - glycosylated haemoglobin assay and 596

HDL [see Lipoprotein]

Heart

- diabetes - calcium flux - rat 281 A
- myocardial infarction - mortality - Hb A₁ and 317 A
- cardiac output 338 A

- ECG 288 A, 309 A
- ischaemic heart disease - diabetes 267 A
- diet, effect of 270 A
- risk factors - diabetes and 324 A, 341 A
- family diabetes 310 A
- left ventricular function - diabetes, Type 1 261 A, 275 A
- exercise 263 A
- myocardial infarction - size - diabetes, Type 1 345 A
- myocardium - ultrastructure - diabetes, experimental 397

Hepatocyte [see also Receptor, insulin]

- glycogenesis - substrates 310 A

High-density lipoprotein [see Lipoprotein]

HLA [see also Genetics; Diabetes, Type 1; MHC]

- D - 'JA' (DR4-associated) - diabetes, Type 1 126s
- diabetes, Type 2 - Papua New Guinea 370
- diabetic nephropathy 3
- DR2 - diabetes, Type 1, segregation analysis 80s

Hyperosmolar coma, diabetic - thromboembolism 281 A

Hypertension - diabetes - treatment 317 A

- diabetes, Type 2 - diet 522
- mortality - diabetes and normal - Finland 322 A

Hypertriglyceridaemia - apolipoprotein gene 180

Insulin gene 180

Hypoglycaemia - counter-regulatory hormones 329 A

- diabetes, Type 1 - risk factors 306 A
- electro-encephalography 321 A
- glucagon release 301 A
- hormonal response - rate of glucose fall 251 A
- insulin-induced - glucagon in recovery 485c

Neuropsychiatric effects 338 A

Nocturnal - diabetes, Type 1 264 A

Visual effects 264 A

Hypoglycaemic agent

- chlorpropamide - action - hepatocyte nuclei 312 A
- ciglitazone 225
- action 296 A
- islet morphology, effect on 270 A
- glibenclamide - action - B-cells, purified 281 A
- permeability effects 315 A
- glucagon secretion - rat 283 A
- gut hormones 274 A
- time of dose 340 A
- mebendazole 52
- metformin - action - muscle, insulin 322 A
- insulin resistance, effect on 321 A
- prescribing 253 A
- therapy - secondary failure 318 A
- prediction of 90s
- tolbutamide - action - somatostatin 305 A
- diabetes, Type 1 8

Hypothalamus - ventromedial nucleus - glucagon secretion and 535

Immune complex - diabetes - IgA contribution 157s

Insulin-anti-insulin - diabetic pregnancy 83s

Immune response - diabetes - T-lymphocyte activation 99s

Islet transplantation, effects of 93s

Immunoglobulin - allotypes - diabetes, Type 1 504

IgA - immune complexes, contribution to 157s

Immunohistochemistry - artefact 392

Immunology - diabetes 545b

Immunology in Diabetes '84 - conference in Rome (Supplement) 65s

Immunosuppression [see also Transplantation]

Immunotherapy [see Diabetes, Type 1; BB rat]

Impotence - diabetes - metabolic control, effects of 290 A

Diabetes - vipergeric penile innervation 320 A

Instructions to authors - complete

July issue (1): A 6

August issue (2): A 15

Editorial 1

Summary Each issue, advertisement pages

Insulin

- action - adipocyte - regulation 258 A
- cardiovascular regulation 286 A
- cholesterol metabolism - rat 330 A
- circadian rhythm 268 A
- cytosol vesicle motion 309 A
- down-regulation - post-receptor [see also Receptor, insulin] 314 A
- energy expenditure in Type 1 diabetes 13
- fasting/refeeding - rat 319 A
- fetal lung maturation 478
- glucagon-suppression - dog 335 A
- glucose distribution, effect on 274 A
- hepatocyte - pyruvate kinase phosphatase 273 A
- rat - fed/fasting 253 A
- immune response 99s
- intra-cellular pH - monitoring in leucocytes 301 A
- lipoprotein lipase 364
- mediator - prostaglandin-inositol c-phosphate 345 A
- membrane protein phosphorylation 344 A
- myocardium 397
- proteolysis, suppression of 286 A
- analogue - action 129s
- despitapeptide - biological properties 337 A
- dimer, covalent - properties in vivo 27
- immunogenicity 129s
- antibody [see Antibody, insulin]
- autoimmune syndrome - proinsulin hypersecretion 348 A
- bioavailability - insulin antibody, effect of 143s
- degradation [see also Insulin, subcutaneous] 207
- intracellular - lysosomal 329 A
- protease 267 A
- denaturation - PPG/PEG block polymers 212
- dimerization - physiological role 337 A
- hepatic extraction - cephalic stimulation 339 A

- measurement 313 A, 314 A
- obesity 258 A
- hyperinsulinaemia - normal man, effects in 307 A
- iron overload, in 610 c
- immunogenicity 592
- human 96 s
- species - erratum 419
- Insulin - infusion**
 - devices 607 w
 - accuracy 340 A
 - materials 286 A, 373
 - pen infusor 340 A
 - intraperitoneal - brittle diabetes 441
 - complications 299 A
 - kinetics 321 A, 344 A
 - intraperitoneal/subcutaneous 254 A
 - intravenous - pulsatile versus continuous 342 A
 - obesity - C-peptide response 347 A
 - portal 257 A
 - stability of insulin [see also Insulin, physicochemical] 212
 - subcutaneous - absorption 238
 - acceptability 283 A, 259 A
 - degradation 238
 - exercise, adjustment for 333 A
 - hypoglycaemia 315 A
 - interruption of 286 A
 - ketoacidosis 297 A
 - kinetics 238, 257 A
 - infusion - lipids and platelets 325 A
 - infusion - subcutaneous - nerve function, effect on 299 A
 - infusion - subcutaneous [see also Insulin, subcutaneous]
 - inhibitor - human plasma 296 A
 - injection - devices - Novo pen 327 A, 344 A
 - dosage computer 250 A
 - intraperitoneal - long-term 334 A
 - mixing insulins 275 A, 286 A, 558
 - subcutaneous [see also Insulin, subcutaneous]
 - absorption 257 A
 - activity 265 A
 - labelled - ¹²⁵I - purification by HPLC 255 A
 - absorption affected by labelling 325 A
 - metabolism [see also Insulin, plasma clearance]
 - modified - sulphated 184
 - physicochemical properties 373
 - molecular weight 285 A
 - plasma clearance - C-peptide, effect of - rat 346 A
 - renal metabolism 351
 - preparations - liposomes - targeted, liver-selective 333 A
 - mixing [see - injection]
 - receptor [see Receptor]
- Insulin - release [see also Insulin secretion]**
 - adrenaline, inhibition by 340 A
 - aromatic amino-acids potentiating 304 A
 - β -cell tropin, stimulation by 271 A
 - calcium antagonists - bepridil 276 A
 - calcium-store blocking agents, effect of 331 A
 - cyclic AMP, role of - forskolin studies 277 A, 313 A
 - -, stimulation - calcium - mouse 250 A
 - dopaminergic effects on 319 A
 - fatty acid oxidation and 306 A
 - fetal rat 307 A
 - glucagon-stimulated - dose-response 333 A
 - glucose-stimulated - cyclic AMP, role of 299 A, 330 A
 - hyperglycaemia, effect of 274 A
 - stimulus dynamics 330 A
 - glutathione reductase activity and 271 A
 - inositol-1,4,5 triphosphate 257 A
 - noradrenaline, effect of 312 A
 - PGE₂, effects of 282 A
 - pH, intracellular and 331 A, 347 A
 - phorbol ester, effects of 290 A
 - phospholipids, role of 284 A, 302 A
 - regulation - insulinoma cell line - rat 335 A
 - serum from Type 1 diabetics, effect of 250 A
 - thiols, potentiation by 252 A
 - thioureas, effect of 310 A
- Insulin - resistance**
 - diabetes, Type 1 - aetiology 258 A
 - ACTH and human growth hormone 298 A
 - diabetes, Type 2 324 A
 - glucocorticoids, synthetic 261 A, 272 A
 - heart - obese Zucker rat 272 A
 - hepatic cirrhosis 261 A
 - hyperinsulinaemia, induced by 358
 - insulin deficiency causing 257 A, 268 A
 - mutants - chimeric toxin, selection by 278 A
 - protease - cytosolic 17
 - proteolysis - diabetes, Type 1 337 A
 - renal failure 319 A
 - haemodialysis, effect of 323 A
 - substrate competition, role of 343 A
 - uraemia 329 A
- Insulin - route of administration - liver uptake affected by 333 A**
 - salivary - man 437
- Insulin - secretion [see also B-cell, pancreatic; Insulin release; Insulin synthesis; Islet, pancreatic]**
 - benzothiadiazines, effects of - dog, rat 583
 - fat-stimulated - GIP, role of 484 c
 - incretin effect 284 A
 - interferon, effect of 601
 - mellitin, enhanced by 312 A
 - prostaglandin E₂, effect of 279 A
 - protein kinase - calcium-phospholipid 305 A
- Insulin - sensitivity - hepatic - diabetes, Type 1 497**
 - tissue heterogeneity 298 A
- Insulin - subcutaneous [see also Insulin infusion; Insulin injection]**
 - absorption - mixing, effect of 558
 - smoking 260 A
 - Ultratard 287 A
 - degradation - syndrome of 327 A
 - Ultralente - pharmacokinetics - species 317 A
 - isophane - species 318 A
- Insulin - synthesis - pro-insulin proteolysis 316 A**
- Insulin - therapy [see also Insulin infusion; Insulin injection; Insulin preparations]**
 - computer-assisted 266 A, 330 A
 - dawn phenomenon - children 267 A
 - glucose production in 297 A
 - growth hormone and 262 A
 - somatostatin, effect of 252 A
 - hypoglycaemia 338 A
 - insulin stability 259 A, 373
 - mixing [see also under Insulin injection] 256 A
 - absorption kinetics 558
- Insulin gene [see Gene, insulin]**
- Insulinoma [see also Tumour, islet-cell]**
 - somatostatin, effects of 336 A
- Insulinitis - non-obese diabetic mouse 113 s**
 - single-cell infiltration - animal model 297 A
- Interferon [see also Diabetes, Type 1 - immunotherapy; Diabetes, experimental - immunotherapy; Immunotherapy]**
 - diabetes, Type 1 193
 - lymphoblastoid - pancreatic islet, effect on 601
- Intestine - rectum - electron-microscopic morphometry 328 A**
 - small - function - diabetes - streptozotocin - rat 289 A
 - small - hormone secretion - rat preparation 322 A
- Iron - overload - hyperinsulism in 610 c**
- Ischaemic heart disease [see Heart]**
- Islet cell, pancreatic [see also A-, B-, PP- and somatostatin cells; and Islet, pancreatic]**
 - culture - human fetal 326 A
 - electrical activity 304 A, 309 A
 - fetal - replication - glucose-stimulated 335 A
 - rat cell line - glucocorticoids 540
 - replication - genetics - mouse 464
 - tumour - function, abnormal 275 A
 - gastrin and cholecystokinin 306 A
 - virus-induced 259 A
 - ionic flux - magnesium 287 A
- Islet, pancreatic [see also Islet cell, pancreatic]**
 - amyloid - diabetes, Type 2 527
 - cyclic AMP - forskolin, study using 287 A
 - culture - fetal rat 324 A
 - free versus monolayer 316 A
 - growth hormone, use of 315 A
 - diabetes, Type 1 - HLA antigen expression 259 A
 - electrical activity - tetraphenylphosphonium effect 317 A
 - electron microscopy 225
 - enzyme - ATP-pyrophosphohydrolase 262 A
 - protein carboxymethylase 262 A
 - flavonoids 287 A
 - hexokinase 279 A
 - human - function - interferon, effect of 601
 - ionic flux [see also B-cell, pancreatic]
 - cholinergic effects - rat 308 A
 - potassium flux - tracers 267 A
 - rubidium - glucose effects 336 A
 - isolated - metabolism 285 A
 - muscarinic receptors - guinea pig 316 A
 - phospholipid - metabolism - rat 322 A
 - glucose, effects of 271 A
 - protein phosphorylation 264 A

- Ketoacidosis, diabetic** – treatment – hyperchloraemic acidosis 311 A
- Ketone bodies** – muscle, production by in diabetes 315 A
- adrenergic regulation 295 A
- Kidney in diabetes** [see also Nephropathy; Urine]
- angiotensin II and 346 A
- exercise, effects of 273 A
- juxtaglomerular apparatus 323 A
- metabolic control and renal function 255 A
- rat model 330 A
- streptozotocin-induced 292 A
- sorbinil, effect of 333 A
- tubular lesions – rat 32
- urinary polysaccharides in Type 1 diabetes 304 A
- Lactate, blood, in obesity and Type 2 diabetes** 321 A
- Lactation** – pancreatic B-cell changes – rat 308 A
- pancreatic islets, effects on 290 A
- Lens, crystalline** – diabetes – sorbinil, effect of – rat 280 A
- transparency 344 A
- metabolism – species differences 482
- Leukotrienes** – pancreatic islet cells, production by 319 A
- Lipoprotein**
- apolipoprotein B – chylomicron – catabolism rate 609 c, 610 c
- glycosylation in vitro 332 A
- high density – diabetes 280 A
- coronary heart disease 301 A
- hypertriglyceridaemia – atherosclerosis risk 343 A
- rat model 348 A
- insulin, acute effects of 364
- low-density – collagen glycosylation products 260 A
- glycosylation – receptor recognition 328 A
- very low density – glycosylation 257 A
- metabolism – diabetes, Type 2 336 A
- Lithium clearance** 189
- Liver** [see also Hepatocyte; Insulin, liver extraction; Receptor, insulin]
- glucose extraction by in conscious pig 323 A
- hormones, effects of – pulsatile administration 298 A
- vasopressin and angiotensin II, effects of 289 A
- LN 5330** [see Benzothiadiazine]
- Lung** – fetal – surfactant – insulin and hydrocortisone effects 478
- Lymphocyte** – subpopulations – diabetes, Type 1 102s
- Lymphocyte, T-**
- activated – diabetes, Type 1 285 A, 342 A
- HLA and 321 A
- susceptibility to Type 1 diabetes 132s
- activation, requirements for – insulin 99s
- transferrin 99s
- blastogenesis – diabetes, Type 1 276 A
- diabetes, Type 1 – heterogeneity 106s
- pregnancy, normal and diabetic 270 A
- subsets – metabolic control, effect of 136s
- Lymphocytotoxicin** in diabetes, Type 1 264 A
- cold-reacting 343 A
- Macrovascular disease, risk factors for** 273 A
- in diabetes: logistic regression analysis 568
- Mebendazole** – hypoglycaemic effect in diabetes 52
- Methionine** – metabolism – streptozotocin-diabetic rat 468
- MHC** [see also Genetics; HLA]
- insulin receptor, interaction with 273 A
- mouse liver 74s
- restriction fragment polymorphism – BB rat 77s
- Microangiopathy, diabetic**
- clotting abnormalities preceding 302 A
- complement C4 levels 255 A
- fibrinolytic activity 493
- fibronectin 493
- genetic factors 487r
- urinary kallikrein reduced 308 A
- Mitochondrion** – alloxan, effect of 379
- Mortality** – diabetes, Type 1 – risk factors – creatinine, serum 291 A
- Mouse**
- C57Bl – strain differences – islet-cell replication 464
- C57Bl/6J *ob/ob* obese hyperglycaemic – muscle, skeletal 407
- pancreas – hormone content 454
- pancreatic islets – ciglitazone 225
- skin properties 44
- C57Bl/KsJ *db/db* – islet-cell antibody 139s
- pancreatic islets – ciglitazone 225
- non-obese diabetic – cyclophosphamide promotes diabetes 601
- diabetic – glucagon 460
- diabetic – immunology 113s, 121s
- Muscle** – glucose metabolism – mouse soleus 302 A
- glucose uptake – insulin, role of 344 A
- metabolism – diabetes, Type 2 273 A
- *ob/ob* mouse 407
- Nauru** – diabetes, Type 2 23
- Neonate** – glucose homeostasis 553
- Nephropathy, diabetic** [see also Kidney]
- albuminuria – conformation 262 A
- evolution – metabolic control 255 A
- glomerulosclerosis – clinical relevance 269 A
- glomerulus – autoregulation impaired 318 A, 547
- immunology 308 A
- incipient – glomerulus – ultrastructure 317 A
- mortality – Warsaw 298 A
- prediction 311 A
- prognosis 259 A
- proteinuria – selectivity 278 A
- renal function – monitoring 252 A
- risk factors – HLA 3
- screening 277 A
- treatment [see Transplantation] 282 A
- Nerve** – autonomic – function in diabetes, Type 1 335 A
- diabetes, experimental – hexokinase 289 A
- maturation – insulin, effect 331 A
- Netherlands, The** – Diabetes, Type 1 203
- Neuropathy, diabetic**
- aldose reductase inhibitor – ICI 128436 335 A
- sorbinil 303 A, 330 A
- assessment – vibration sensation, thumb 272 A
- autonomic – cardiovascular – assessment 304 A
- electrocardiography 255 A, 256 A
- computer analysis of 317 A
- exercise 307 A
- catecholamine sensitivity 288 A
- glucose response to meal in 329 A
- metabolic control, effect of 332 A
- sympathetic, peripheral 563
- blood flow in 563
- ischaemia, effect of 300 A
- microangiopathy associated 348 A
- microvascular abnormalities 339 A
- painful – blood flow and 563
- substance P 264 A
- thermal discrimination 256 A, 283 A
- vascular responses 324 A
- vibration threshold – conduction velocity 314 A
- Nifedipine** – glucose homeostasis, effects on 260 A
- Nutrition** – diabetes, Type 1 – Scotland 290 A
- Obesity** – insulin receptor – adipocyte 447
- thermogenesis 324 A
- glucose intolerance affecting 314 A
- Oestradiol** – clearance – diabetes – rat 268 A
- Old age** – diabetes 167r
- Oral hypoglycaemic agent** [see Hypoglycaemic agent]
- Osteopenia** – diabetic neuropathy 266 A
- Pancreas** – exocrine – function – obesity 339 A
- Pancreatic islet** [see Islet, pancreatic]
- Pancreatic polypeptide** – *ob/ob* mouse 454
- plasma – secretin, stimulation by 277 A
- Peptide YY** – glucose, oral 251 A
- Phospholipid** [see also B-cell, pancreatic; Insulin release; Pregnancy, diabetic]
- fetal and maternal lung – diabetic rat 219
- Pineal gland** – pancreatic islet, effects on 313 A
- glucagon, effects of 339 A
- Placenta** [see also Pregnancy]
- human – insulin, effect of 305 A
- Platelet** – diabetes, Type 2 – arachidonic acid uptake 242, 243
- fibrinogen binding – diabetes 263 A
- function – dihomogammalinolenic acid 311 A
- hypoglycaemia, effect of 340 A
- membrane – glycosylation 326 A
- prostacyclin, effect of – hyperglycaemia and 279 A
- Polyethylene glycol (PEG)** [see PPG]
- Polyol pathway**
- enzymes – animal models 482
- erythrocyte in diabetes 343 A
- myo-inositol 514
- sorbitol 514
- sorbitol – diabetes, Type 1 509
- Polypropylene glycol** [see PPG]
- PPG/PEG block polymers** 212
- Pregnancy**
- diabetes – fetal growth, early – assessment 334 A

- fetal lung - rabbit - hormones, effect of 478
- rat model 259 A
- fetal monitoring 270 A
- fetal nutrient fluxes - rat 272 A
- insulin antibodies - immune complexes 83 s
- insulin treatment regimes 340 A
- lung phospholipid - rat 219
- neonate - glucose homeostasis 553
- outcome - UK 305 A
- placental morphology - CSII and 302 A
- pre-conception CSII 300 A
- gestational diabetes - GIP response 255 A
- insulin therapy - outcome 349 A
- normal - glucose homeostasis 276 A
- glucose tolerance versus outcome 336 A
- hepatic insulin extraction 254 A
- insulin resistance 262 A
- placenta - glycogen - rat 254 A
- Proglucagon - conversion products - major fragment 318 A
- Proinsulin
 - assay - human standard 300 A, 414
 - insulinoma patient 268 A
 - human - acute effects - normal man 335 A
 - antibodies - monoclonal 281 A
 - pharmacology 327 A
 - split forms 276 A
 - subcutaneous injection 250 A
 - synthesis - B-cell, pancreatic 325 A
- Prostaglandins - diabetes, Type 1 299 A
- E₂ - glucose metabolism, effects on 325 A
- PGI₂ (prostacyclin) - glucose, effect of 62 c
- Psammomys obesus* - metabolism 283 A
- Psychometry - diabetic patients - perceptions about diabetes 277 A

 - glucose, conjugated 433
 - glucosyl/galactosyl ratio 433
- VIP - insulin action, inhibition of - rat adipocyte 282 A
 - neural - diabetes - rat 252 A
- Virus - Coxsackie B4 - pancreatotropicism 349 A
 - encephalomyocarditis - islet function - mouse 336 A
 - rubella - congenital - islet cell surface antibody 87 s
- Vitamin D system - insulin, effects of 315 A
- Zucker rat, obese - glucose transport in adipocyte 282 A
